

## Voluson™ Education

# Expert-Led Always Ahead

In today's fast-paced medical world, continuous education is key. At GE HealthCare, we believe the right technology is just the start – unlocking your Voluson system's full potential is what drives better patient care.

That's why we created Voluson Education – a global network of expert-led programmes to enhance your skills, deepen your knowledge, and improve patient outcomes.

Wherever you are, Voluson Education makes learning easier and more impactful, empowering you to deliver exceptional care.

## Learn more about our on-site offerings

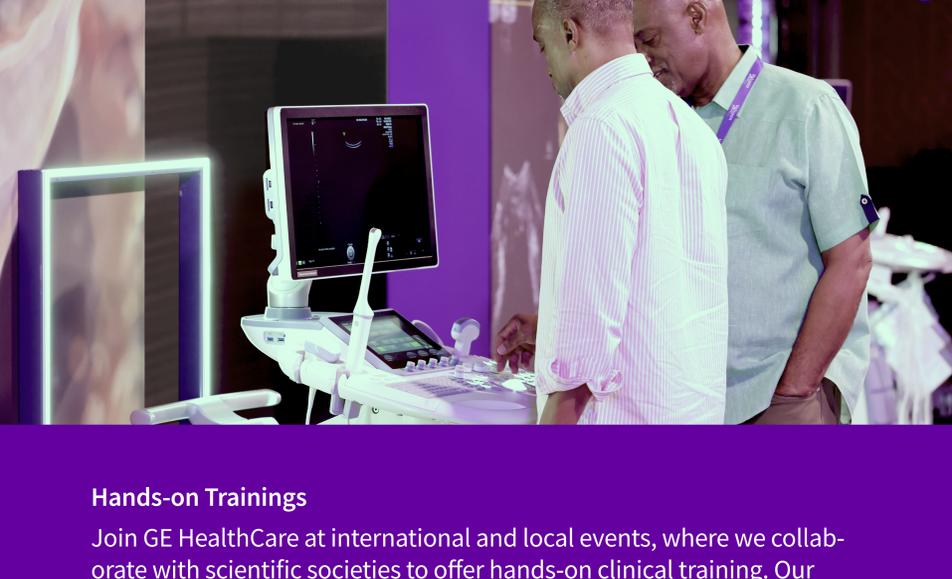

### Clinical Application Specialists Trainings

Benefit from in-person visits by a team of expert clinical application specialists. Our team of clinical application specialists combines extensive, up-to-date technical knowledge with a deep understanding of clinical environments to provide tailored, high-impact training.

Ask your country representative how to book a training.

### Regional Voluson Academies

Unlock exclusive, regional-specific courses with hands-on training in your local language. Ensuring that you receive the most relevant, impactful training for your practice. Visit [VolusonClub.net](http://VolusonClub.net) to discover the dates of the next events.

### Hands-on Trainings

Join GE HealthCare at international and local events, where we collaborate with scientific societies to offer hands-on clinical training. Our technology and application specialists provide expert support, ensuring you gain practical knowledge and insights that are directly applicable to your clinical practice. Visit [VolusonClub.net](http://VolusonClub.net) to learn when and where the next opportunities will take place.

### VISUS Courses

For over 25 years, VISUS, a GE HealthCare course, has been the go-to training for healthcare professionals in fetal medicine and gynaecology. This advanced 3D/4D ultrasound training includes expert-led lectures and hands-on 'tips and tricks' sessions in a two- to three-day immersive experience. It's the perfect opportunity to deepen your expertise, discover new techniques, and network with peers, all while using cutting-edge Voluson systems. Visit [VolusonClub.net](http://VolusonClub.net) to register for the next VISUS Course.

## Learn more about our digital offerings

### Voluson Club

The Voluson™ Club is your gateway to exclusive education opportunities, available at no cost. As a member, you'll gain access to the latest updates on courses, events, webinars, tutorials, recordings, posters, white papers, and more – all focused on Voluson systems and solutions. Membership is free, but registration is required to access full content and receive email notifications. To join, visit [VolusonClub.net](http://VolusonClub.net) and click on 'Become a member.'

### Voluson Virtual Academy

Exclusive clinical webinars featuring renowned key opinion leaders and leading scientific societies. Stay informed, expand your expertise, and connect with the forefront of innovation in healthcare through these impactful sessions. Watch our recorded Virtual Academy sessions or check free live event spots on our webinar calendar directly on [VolusonClub.net](http://VolusonClub.net).

### Expert Live Support

Receive expert clinical and technical support remotely from GE HealthCare, ensuring faster resolutions and continuous system performance. Our team of expert application specialists is ready to assist you without the need to wait for an on-site visit. With InSite™ connectivity, GE HealthCare experts can access your system directly, providing faster tech support, software and OS updates, and preset optimisation. Check the website to benefit from our Expert Live Support or ask your local representative about how to book a session.

### STAR App by GE HealthCare

Your digital assistant always with you on your mobile device. The STAR App offers AR guides for easy system navigation, real-time expert support, and access to training, system info, news, updates, and clinical events. Check the website to know how to download the STAR App via Voluson Education.
